Brigadier General (IT Air Force) Achille CAZZANIGA

On the basis of a specific Italian Direzione Nazionale Antimafia e anti-terrorismo (DNA) and operation Sophia agreement, a system for collecting and analysis of data concerning human trafficking processes covering the period July 2015-September 2017 was organized.

The analysis and its results (evaluated together with other data held by operation Sophia and over 60 items), used for research and investigative prompts, represent the starting point for the second report already under production.
