

GENERAL CHARACTERISTICS

Aircraft: Dassault Aviation
Length: 18,80 m
Wingspan: 18,90 m
Height: 6.97 m
Max take-off weight: 18.500 kg
Speed : 685 km/hr or 370 knots
Autonomy: 6,30 hrs

OVERVIEW

These aircrafts of this type are currently in service with the 24F flotilla, based on Lann-Bihoué.

The sea rescue missions, surveillance of exclusive economic zones, pollution control, monitoring of shipping and the illegal traffics networks are the main tasks for it.

Navigation accuracy is a matter of two hybridized inertial GPS stations. Like other maritime surveillance aircraft, the Falcon 50 is also largely equipped with communications equipment.
